

Engineered for Performance.

Designed to be removed.

The Smart, Spray Applied System for Temporary Linemarking.
Removes Cleanly, Protects Pavement Assets, Saving Time and Money.

Problems with existing methods

**Damages
Roads**

Leaving
scarring and
ghost lines

**Delays
Projects**

Longer
closures and
resurfacing

**Higher
Costs**

Triggered by
repairs and
compliance

THE TEMPLINE ADVANTAGE

Engineered for lane shifts,
diversions, symbols and
blackout marking

White topcoat

Black basecoat

- ✓ **2-layer system:** Black basecoat + white topcoat = clean lift, no ghost lines
- ✓ **Steam removable** with Class A equipment, NO surface scarring or resheeting required
- ✓ Spray-applied with **standard equipment**
- ✓ **10-minute dry time** for quick traffic switches
- ✓ **Non-toxic, waterborne**, landfill-safe waste
- ✓ **No re-prep needed** before final markings

**Engineered for efficiency.
Proven on Roads.**

TEMPLINE delivers durability and visibility like traditional pavement marking systems — yet removes cleanly without grinding or scarring.

Preserve Pavement Assets.

Avoid Resurfacing.

**Tested on
Australian Roads**

**Follow QR Code
for SDS and
Installation Guide**

Erskine Park:
Outperformed
manual
methods

Moss Vale:
Long term
high traffic,
excellent wear
resistance &
bead retention
