

The next generation of line marking: simpler application, safer handling, and more sustainable

VITALINE H₂K is a premium, two-component waterborne roadmarking paint that delivers long lasting visibility, safer application and environmental responsibility – a smarter alternative to CAP/THERMO.

VITALINE H₂K
stays brighter, holds
beads longer and grips
surfaces stronger without
exposing operators to
harsh solvents.

Engineered for:

Durability,

Safety and

Sustainability

1st installation of VITALINE H₂K in ANZ at Greenhills NSW Sept 2025
containing DOW durable technology

Outstanding Anti-Skid Properties

VITALINE H₂K delivers exceptional skid resistance when applied with Rayolite's VITAGRIT coloured aggregate.

Ideal for broad surface areas, symbols, and high-wear zones.
